Product Description

The integration of the design and creative concepts of simulated artificial green plants with home and commercial environments can bring a natural, comfortable and beautiful atmosphere to indoor and outdoor spaces. Whether it is to add green elements, supplement space decoration, or enjoy the beauty of nature, artificial plants indoor or outdoor are a good choice.

Never-fading beauty: Simulated green plants use high-quality materials and advanced manufacturing technology to give them realistic appearance and color. Compared with real plants, artificial green plants are not affected by seasonal changes, light or moisture, so they can maintain their beauty forever. Whether indoors or outdoors, simulated green plants can bring a sense of nature to your home environment.

Lightweight, durable and easy to clean: Simulated greenery is often made from lightweight but sturdy materials, such as plastic or silk. This makes them easy to handle, place and move. At the same time, these materials are durable and can withstand the test of time and use. In addition, simulated green plants are easier to clean and maintain than real plants. Just wipe them gently with a damp cloth or hair dryer to keep them clean and fresh.

Realistic appearance and details: The design and production process of artificial green plants pays attention to details, striving to make their shapes, textures and colors as close as possible to real plants. Viewed from a distance, simulated green plants are nearly indistinguishable from real plants. Even when viewed up close, the details of the artificial trees are lifelike, giving people a realistic feel. This makes them ideal for decorating a variety of spaces, such as homes, offices, commercial settings, and more.

FAQ

1.About size

Due to manual measurement, different measuring tools and measuring techniques, there may be a discrepancy of about 2-3cm.

Error is normal

2.About color

There may be color differences in pictures due to different display devices, lighting, etc. The actual product received shall prevail.

3. About Express delivery

Plants and flower pots are shipped separately (2 express packages) and may arrive one after another, please check the express delivery

Please contact our customer service for the order number

4. Special notes

Simulated flower plants are different from real plants. Please do not overthink it. The leaves and flower stems are fixed with glue.

It is inevitable that there will be traces of adhesion. This is a normal phenomenon and does not affect use.
